FLUID MILK AND CREAM REPORT

1.9
M34M
Cof. 2
JANUARY 1967

January 17, 1967

SUMMARY

Seasonal declines in dealers' buying, store and home prices in early January were reported by the Crop Reporting Board. Fluid use prices declined in 22 markets; all other markets were at December levels. Store prices for half-gallons decreased in 20 markets but advanced in 6; gallons were down in 19 markets but were up in 8. Home delivery prices were lower in 14 markets for quarts and in 11 markets for half-gallons. Higher route prices were reported in 4 markets for quarts and 5 markets for half-gallons.

Prices of milk used for fluid purposes in early January in about 175 markets averaged \$6.15 per hundredweight -- 4 cents less than December but 59 cents more than January last year. Averages were lower than December in 6 of the 9 regions, about the same in 2, but higher in 1. Compared with January 1966, regional averages were higher in all 9 regions. These increases ranged from 28 cents in the Pacific Region to 88 cents in the East North Central States. Larger increases over a year earlier were: 84 cents per hundredweight in the West South Central, 71 cents in the Mountain, 63 cents in the West North Central and 61 cents in the South Atlantic. Lesser downward changes from last year were: 59 cents per hundredweight in the East South Central, 44 cents in the New England, and 42 cents in the Middle Atlantic.

Half-gallon prices for the most common grade of whole milk sold out of stores in 25 major cities in early January averaged 50.9 cents. This is 0.2 cent less than December, 3.7 cents more than January 1966 and 4.8 cents higher than the January 1961-65 average. Single quart home delivered prices in these same markets averaged 31.0 cents in early January -- the same as December but 2.4 cents greater than the 1960-64 average for the month.

Whole milk sales (preliminary) during November in 9 State and 66 Federal marketing areas were 1 percent below October and 3 percent less than November 1965. Sales for the first 11 months of the year were about the same as in 1965. October whole milk sales in these 75 areas were 1 percent below September and 2 percent less than a year earlier. Skim sales in 74 areas during October were 1 percent lower than September but 11 percent more than October 1965. Daily sales of mixtures of milk and cream (half and half) in 72 areas were 2 percent under September and 5 percent below October a year earlier. Sales of other cream items in 73 areas during October averaged 3 percent (daily) less than September and 7 percent under October the previous year. All fluid product sales for October in 73 areas were 1 percent lower than September and unchanged from October 1965. Average daily receipts from producers in 74 areas for November were slightly higher than a year earlier. Per producer, November receipts averaged 954 pounds daily, 6 percent more than the same month in 1965.

PRICES IN FLUID MILK MARKETS, JANUARY, 1967

In New England, early January fluid-use milk prices averaged \$6.83 per hundredweight. This is 22 cents below December but 44 cents higher than January a year ago. Class I prices in all reporting New England markets were 22 cents per hundredweight lower. In Augusta and Portland, Me., store and home prices were down $\frac{1}{2}$ cent per quart; Caribou-Presque Isle prices were unchanged. Some prices in New Hampshire markets were changed; others were at December levels. Home delivered quarts were 1 cent less for the only change in Bellows Falls, Vt. Store and home prices in Southern New England markets were generally $\frac{1}{2}$ cent per quart below December but some exceptions were reported.

Class I prices in the Middle Atlantic Region in early January averaged \$6.52 per hundredweight -- 6 cents less than December but 42 cents more than January 1966. An 11-cent per hundredweight decrease in the New York-New Jersey Class I price was reported. Most home and store prices in the area were unchanged but some exceptions were noted. Class I prices in both Buffalo and Rochester, N. Y. were 19 cents per hundredweight above December. Mixed changes at stores and to homes in these markets were reported.

East North Central area milk used for fluid purposes averaged \$5.63 per hundredweight in early January. This is unchanged from December but 88 cents above January a year earlier. In Akron, Cincinnati, Cleveland and Youngstown-Warren, Ohio, store prices showed advances, but Class I and home prices were reported at December levels. In Alton, Peoria, and Springfield, Ill., adjustments in home and store prices for various container sizes were reported. Peoria Class I prices were up from 6 to 16 cents per hundredweight. Store half-gallons were down as much as 3 cents for the only reported change.

In early January, prices of milk for fluid milk use in West North Central markets averaged \$5.34 per hundredweight -- a decline of 3 cents from December but were 63 cents higher than January last year. The Duluth-Superior, Minn.-Wis. market reported store and home prices 1 cent per quart higher. Class I prices in this area were unchanged. Fluid-use prices in Burlington, Ia. were down 30 cents per hundredweight. Store and home prices were at month earlier levels. Springfield, Mo. reported a small adjustment in home delivered prices. At Grand Forks and Rapid City, S. D. mixed changes in some store and home prices were reported. Class I prices were unchanged. Increases in store prices for some outlets were the only price changes reported in Wichita, Kans.

Average Class I prices in the South Atlantic Region, at \$6.66 per hundredweight in early January, were 1 cent higher than December and 61 cents above January 1966. Half-gallons out of stores declined $5\frac{1}{2}$ cents for the only reported price change in the greater Washington, D. C. area. Several adjustments in prices at both stores and homes were reported in Huntington, W. Va.

Dealers' buying prices for fluid-use milk in early January averaged \$6.22 per hundredweight in East South Central markets. This is 1 cent under December but 59 cents over January last year. The only important price change reported for the region is a 2-cent decrease in half-gallons out of some stores in Chattanooga, Tenn.

Early January prices of milk used for fluid purposes averaged \$6.65 per hundredweight in the West South Central area. This is 3 cents lower than December but 8½ cents over January a year earlier. Ft. Smith, Ark. reported half-gallons as much as 19 cents higher as price war conditions relaxed somewhat. At stores, half-gallons were 4 cents and gallons from 6 to 10 cents lower than December in Tulsa, Okla., other prices in this market were unchanged. Price war conditions in Amarillo, Tex., reported last month, were somewhat relaxed as prices were as much as 3 cents per quart higher for some units of sale. Store and home prices in Austin, Tex. were 1 cent per quart below December; Class I prices were unchanged. At Corpus Christi, Tex., store prices were as much as 5 cents per quart less; other prices in this market were unchanged. Store prices were also lower in Houston, Tex. with other prices at December levels. Both store and home prices advanced from previously low unsettled conditions in Lubbock, Tex., Class I prices were at December levels.

In the Mountain States, fluid-use prices in early January averaged \$6.29 per hundredweight -- 1 cent under December but were 71 cents over January a year ago. Half-gallons at both stores and homes in Cheyenne, Wyo. dropped a cent for the only important change in market prices. Gallons in Denver advanced 2 cents for the only important market change. At Phoenix, Ariz., store half-gallons were 2 cents less as other prices remained at December levels.

Class I prices in Pacific areas, at \$5.62 per hundredweight in early January, were at the same level as December but 28 cents more than January 1966. The only reported price change in the region was at Portland, Ore. where milk in gallon jugs was 30 cents lower at some outlets.

Continued from page 21

November milk production equals 1965 level

Milk production in the United States during December is estimated at 9.6 billion pounds -- about the same as December a year earlier but 3 percent less than the 1960-64 average for the month. Per capita production in December was 1.56 pounds compared with 1.58 in December 1965.

Table 2.--Dealers' average buying prices for milk for

a. Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.
b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised.

SALES OF MILK AND CREAM AND RECEIPTS OF MILK FROM PRODUCERS IN CERTAIN MARKETING
AREAS UNDER STATE AND FEDERAL REGULATION, OCTOBER-NOVEMBER, 1966

November whole milk sales 3 percent below a year earlier

Sales of whole milk (preliminary) in 9 State and 66 Federal marketing areas during November, at 91.0 million pounds daily, were 1 percent lower than October and 3 percent less than the 93.6 million pounds in November 1965. For the first 11 months of 1966, whole milk sales were about the same as a year earlier. October whole milk sales in these markets were 1 percent below September and 2 percent less than October the previous year. The milkfat test of sales of whole milk products in October was 3.54 percent, compared with 3.53 for September and 3.54 for October 1965.

Skim sales during October 11 percent higher

Average daily sales of skim milk products during October in 74 areas were 1 percent less than September but 11 percent more than October 1965. The 10-month total for 1966 to date averaged 11 percent above the same period the preceding year. The milkfat test of sales of skim products during October averaged 1.45 percent compared with 1.44 percent for September and 1.38 percent for October a year earlier.

Half and half sales decline 5 percent from October 1965

In 72 areas, October sales of mixtures of milk and cream (half and half in most markets), when averaged on a daily basis, were 2 percent smaller than September and 5 percent less than October the preceding year. For the first 10 months of 1966, mixture sales were 2 percent lower than the similar period of 1965.

Sales of other cream products drop 7 percent from a year earlier

Average daily sales of other cream products in 73 areas in October averaged 3 percent (daily) lower than September and were down 7 percent from October 1965. The 10-month total (through October) for 1966 is 3 percent lower than for the similar period of 1965. Milkfat tests of these products averaged 22.6 percent in October and 22.7 percent in both September 1966 and October a year earlier.

Total fluid product sales in October unchanged from last year

Sales of all fluid products in total during October 73 areas. (average daily) were 1 percent under September and unchanged from October 1965. Sales of all fluid products for the period January-October 1966 were 2 percent above the same period in 1965. The average milkfat test of all fluid products during October was 3.50 percent, the same as September but below the average of 3.54 percent in October 1965.

Milk receipts continue slightly higher than November 1965

Producer receipts of milk in 8 State and 66 Federal areas during November were slightly higher than a year earlier. Per producer, receipts averaged 954 pounds daily, 6 percent higher than November a year earlier.

Continued on page 13

OFFICIAL BUSINESS

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Ft. Wayne and Indianapolis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.

FLUID MILK AND CREAM REPORT

FEBRUARY 1967

FEB 27 1967

February 17, 1967

SUMMARY

Fluid milk prices in early February were generally unchanged to somewhat lower with more reported declines at stores and homes than for dealers' buying prices, according to the Crop Reporting Board. Prices for fluid-use milk decreased in 4 markets; and no increases were reported. Store price changes were as follows: half-gallons, down in 11 markets, up in 5; gallons, lower in 9 markets, higher in 8. Home delivered quart prices declined in 5 markets but advanced in 4; half-gallons were lower in 6 markets, higher in 1.

At \$6.14 per hundredweight, fluid-use prices in early February in about 175 markets averaged 1 cent less than January but 55 cent more than February 1966. The average this month is 69 cents more than the February 1961-65 average. Compared with January, February averages were lower in 5 regions but unchanged in 4. Regional averages were higher than February 1966 in all 9 regions. These increases ranged from 28 cents per hundredweight in Pacific area to 81 cents in the West South Central States. Increases in other regions were reported as follows: East North Central, 77 cents; Mountain, 71 cents; West North Central, 62 cents; South Atlantic, 60 cents; East South Central, 55 cents; New England, 44 cents; and Middle Atlantic 40 cents.

For the most common grade of whole milk sold out of stores in 25 major cities in early February, half-gallon prices averaged 50.5 cents--0.2 cents under January, but 3.1 cents over February a year earlier and 4.3 cents higher than the 1961-65 average for the month. For home delivered single quarts in these same markets, the average in early February was 30.8 cents. This is unchanged from January, but 2.2 cents higher than February 1966 and 3.6 cents above the 1961-65 February average.

Whole milk sales (preliminary) in December in 9 State and 66 Federal marketing areas, when averaged daily, were 1 percent below November and 2 percent below December 1965. Whole milk sales during 1966 were about the same as the 1965 total. November sales of whole milk were 1 percent less than October and 3 percent under November 1965. Skim milk product sales during November averaged 2 percent greater than October and 12 percent more than a year earlier. Sales per day of milk and cream mixtures (half and half) during November increased 2 percent from October but were 6 percent under November 1965. Other fluid cream sales in November were up 22 percent from October but down 7 percent from a year earlier. All fluid product sales when totaled averaged 1 percent more than October but were fractionally less than November 1965. December receipts from producers in 74 areas averaged 1 percent higher than a year earlier. December receipts per producer averaged 992 pounds per day, 6 percent higher than December 1965.

PRICES IN FLUID MILK MARKETS, FEBRUARY 1967

Prices of milk for fluid use in early February in New England averaged \$6.83 per hundredweight--the same as January but 44 cents above February a year earlier. No changes in Class I prices for the region were reported. There were minor adjustments in store and home prices in Bellows Falls, Vt., Lowell-Lawrence, Mass., and New Haven, Conn.

In early February, dealers' buying prices for fluid-use milk in Middle Atlantic States averaged \$6.49 per hundredweight. This is 3 cents under January but 40 cents over February last year. Class I prices in the New York-New Jersey area were 5 cents per hundredweight lower. Home delivered single quarts in New York City were down about a cent; half-gallons were lower in some portions of the market. The only other reported changes in the region was a drop of 4 cents for milk sold in half-gallon containers out of stores and an increase of 2 cents in home-delivered quarts in Camden, N. J.

In the East North Central Region, fluid-use prices in early February averaged \$5.62 per hundredweight--1 cent less than January but 77 cents more than February a year ago. Unsettled conditions in Evansville, Ind. resulted in a 6-cent decrease in gallon container prices in some stores and a decline of 2 cents for home delivered quarts. In South Bend, Ind., also reporting price-war conditions, store prices were 2 cents lower for half-gallons and 10 cents lower for gallons in some stores. A 1-cent increase in the price of home delivered half-gallons was the only reported change in Chicago prices. Unsettled conditions in Springfield, Ill. prevailed as lower prices at both store and home outlets were reported. Both Madison and Milwaukee, Wis. reported Class I price 20 cents per hundredweight lower than January. Home delivered quarts were a cent higher for the only other change in Madison. Milwaukee store and home prices were as much as $2\frac{1}{2}$ cents per quart less than January.

At \$5.33 per hundredweight, early February prices of milk for fluid use in the West North Central States averaged 1 cent below January but 62 cents higher than February 1966. Most prices in the region were at January levels. However, a 2-cent decrease in store half-gallons was reported in Burlington, Ia. No other price changes were reported for this market. St. Louis home delivered half-gallons were also 1 cent lower for the only reported price change.

South Atlantic Region Class I prices in early February averaged \$6.66 per hundredweight. This is the same as January but 60 cents higher than a year earlier. A 13-cent decline in the Class I price was reported for Bristol, Va. Other prices in this market were at January levels. An increase in the price of gallon jugs sold out of some stores in Huntington, W. Va. was the only reported change in this market. A drop of 4 cents in the price of store half-gallons in Miami, Fla. was reported. Increases in store prices in Tampa, Fla. were reported; home delivered prices remained at previous month levels.

Early February prices for fluid-use milk in the East South Central States averaged \$6.18 per hundredweight, 4 cents less than January but 55 cents more than February a year ago. Several price adjustments at both stores and homes were reported in Lexington, Ky., but the Class I price was unchanged. Chattanooga, Tenn. reported substantial drops in the prices of most whole milk items as price war conditions prevailed. The Class I price was unchanged. The Class I price in Nashville, Tenn. was 35 cents per hundredweight lower. Other prices in this market were about a cent per quart below January for both stores and homes.

Fluid-use prices in the West South Central Region averaged \$6.64 per hundredweight in early February--a decline of 1 cent from January but 81 cents higher than February 1966. Unsettled conditions in Ft. Smith, Ark. resulted in lower store prices for most items. Class I and home delivery prices were at January levels. A price war in Tulsa, Okla., with substantially lower store prices, was reported. Class I and home delivered prices in this market were unchanged. In Abilene, Tex., price war conditions in effect since November were relaxed this month as store prices returned to more normal levels. In Austin, Tex., store gallon prices were up 2 cents for the only reported change in the market. In Corpus Christi, Tex., the unsettled conditions reported in January had relaxed and prices at both stores and homes were higher. In Dallas, Tex., store gallons and home delivered half-gallons were higher for the only reported changes in the market. Half-gallon prices at some store outlets were 3 cents higher and store gallons were 3 cents lower at some outlets for the only reported price changes in Houston, Tex.

Milk used for fluid purposes in the Mountain States in early February, averaged \$6.29 per hundredweight. This is about the same as January but 71 cents lower than February a year ago. The only reported price change in markets in this region was a 2-cent increase in store half-gallons in Phoenix, Ariz.

In Pacific markets, Class I prices, at \$5.62 per hundredweight in early February, were about the same as in January but 28 cents greater than February 1966. The only reported change in prices for this region was a $\frac{1}{2}$ cent increase in home delivered quarts in Bremerton, Wash.

(Continued from page 21)

Sales of all fluid products down fractionally

Total fluid product sales in 73 areas during November averaged (daily) 1 percent higher than October but fractionally lower than November a year earlier. The 11-month total in 1966 was 2 percent above the comparable period of 1965. The average milkfat test of all fluid product sales during November was 3.55 percent compared with 3.50 percent in October 1966 and 3.60 percent in November 1965.

Receipts of milk from producers continue above previous year

Receipts of milk from producers in 8 State and 66 Federal areas for December were 1 percent higher than December 1965. Receipts per producer in these areas averaged 992 pounds per day or 6 percent greater than a year earlier.

Milk production during January slightly higher than a year earlier

Production of milk in the United States for January, estimated at 9.9 billion pounds, was one-half of 1 percent above January 1966 but 4 percent below the 1961-65 average for the month. Production per person in January was 1.60 pounds, compared with 1.61 pounds in January 1966.

a. Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised. Revised prices for months of 1966 shown in table 14.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS
UNDER FEDERAL AND STATE REGULATION, NOVEMBER-DECEMBER, 1966

Sales of whole milk during December 2 percent below a year earlier

Daily sales of whole milk in 9 State and 66 Federal marketing areas during December averaged 90.5 million pounds per day. This is 1 percent less than November and 2 percent less than the 92.3 million pounds per day in December 1965. Whole milk sales for the entire year 1966 totaled about the same as in 1965. November whole milk sales were 1 percent below October and 3 percent under November 1965.

November skim milk sales 12 percent over previous year

In 74 areas, average daily sales of skim milk products for November were 2 percent higher than October and 12 percent above November 1965. The 11-month total of skim sales for 1966 was 11 percent higher than the first eleven months of 1965. The average milk-fat test of skim milk sales during November was 1.46 percent, compared with 1.45 percent in October and 1.38 percent a year earlier.

November cream-product sales below previous year

Average daily sales of mixtures of milk and cream (half and half in most markets) during November advanced 2 percent from October, but were 6 percent less than November 1965. Cumulative sales for the first 11 months of 1966 were 2 percent below 1965. Daily sales of other fluid cream products in November were 22 percent greater than October but were down 7 percent from a year earlier. The 11-month total of sales in 1966 was 4 percent less than the comparable total in 1965.

(Continued on page 13)

FLUID MILK AND CREAM: PRICES, AND RECEIPTS, 1966
(Pages 28-31)

Price of milk used for fluid purposes during 1966 up 43 cents per hundredweight

Dealers' buying prices of milk for fluid use in 1966 averaged \$5.82 per hundredweight. Compared with the previous year all monthly averages in 1966 were higher. Gains from a year earlier were 9 cents in early January and increased to 40 cents in May. The gain in June of 39 cents was followed by larger gains each succeeding month and was 70 cents in October. The increase was 65 cents in November and 63 cents in December. The annual average fluid-use price was higher than in 1965 in all regions of the country with gains ranging from 13 cents per hundredweight in the Pacific States to 71 cents in the West North Central. Other large increases were 70 cents in the West South Central, 64 cents in the East North Central and 59 cents in the Mountain States. Smaller increases by region over the previous year were: 51 cents in New England, 41 cents in the East South Central and 37 cents in each the Middle Atlantic and South Atlantic States.

Store and home-delivery prices for whole milk above a year earlier

Prices for whole milk of the most common grade and container type in half-gallons sold out of stores in 25 major cities averaged 49.4 cents in 1966. This is 3.2 cents per half-gallon higher than in 1965. Increases in out-of-store prices from a year earlier ranged from less than a cent per half-gallon in 3 markets to over 5 cents in 4 markets. Single quarts delivered to homes in these same markets averaged 29.7 cents for 1966, an increase of 1.6 cents from 1965. The average for 1966 was higher in all 25 markets. In 7 markets, the average was less than a cent above 1965 but in 6 markets the 1966 average was more than 2 cents higher than the previous year.

Receipts during 1966 slightly lower than preceding year

Producer receipts of milk in 74 marketing areas (8 State and 66 Federal) during 1966 averaged 138 million pounds per day. This is a fraction of a percent less than 1965. The average number of producers during the year in these areas was 139,000, down 6 percent from the previous year. Receipts per producer in these marketing areas in 1966 averaged 966 pounds per day, 6 percent more than in 1965.

1/ Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

2/ Preliminary.

1/ Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

2/ New York Metropolitan-New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

3/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every-other-day delivery, the charge represents a two-quart purchase.

Table 15.--Average daily receipts of milk from producers, number of producers, and average daily receipts per producer in certain State and Federal Order marketing areas, 1965-66 1/

F-Federal Order unless otherwise noted; S-From State sources; FS-From Federal and State sources.

1/ Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See page 32 for area combinations. 2/ Federal totals less State data on receipts from New Jersey or Mississippi producers where applicable. 3/ Plant receipts of Grade A milk from producers in the State.

Compiled from reports of Market Administrators and State milk control agencies.

OFFICIAL BUSINESS

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Ft. Wayne and Indianapolis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.

FLUID MILK AND CREAM REPORT

U. S. DEPARTMENT OF AGRICULTURE

MARCH 1967

APR -3 1967

March 17, 1967

CURRENT SERIAL RECORDS

PRICES IN FLUID MILK MARKETS

March prices paid by dealers for milk used for fluid purposes averaged \$6.01 per hundredweight in 176 markets, according to the Crop Reporting Board. The March average is down 13 cents from February but 42 cents above a year ago. Dealer's prices declined in nearly one-half of the markets reporting, but many of the reductions were relatively small. Averages of dealers' prices declined from February in all regions but the decrease was only 1 cent per hundredweight in the South Atlantic and Pacific Regions. Increases in regional averages from a year earlier ranged from 22 to 60 cents per hundredweight.

Store prices to consumers in 25 cities for the most common grade of whole milk averaged 50.2 cents per half-gallon in early March. The 25-city average was down 0.2 cents from a month earlier but was 2.5 cents above March 1966. Prices for home-delivered quarts in the 25 cities averaged 30.8 cents in early March, unchanged from February and 2 cents above a year earlier.

In New England, dealers' Class I prices dropped 22 cents per hundredweight from February in all markets except those in Vermont. New England average of \$6.61 per hundredweight for March is 22 cents above a year ago. Store prices for half gallons dropped 2 to 6 cents from February in 6 New England markets but there were few changes in home-delivery prices. The average of Class I prices in the Middle Atlantic States declined 12 cents from February to \$6.37 per hundredweight, mostly because of a 17 cent reduction in the New York - New Jersey order price. Prices to consumers dropped 1 cent per quart in Harrisburg and Scranton.

Dealers' prices for fluid - use milk in the East North Central Region averaged \$5.48 per hundredweight in March, down 14 cents from February but 59 cents above a year earlier. Class I prices dropped 24 to 32 cents from February in all Illinois markets reporting, also in Youngstown - Warren, Ohio; South Bend and Gary, Ind.; Marquette, Mich. and Beloit and Green Bay, Wis. The most significant changes in consumer prices in this region were general declines in store prices in South Bend, Ind.; Alton, Ill.; and Eau Claire, Wis. In the West North Central Region, dealers' Class I prices averaged \$5.15 per hundredweight in March, down 18 cents from February but 40 cents above March last year. Class I prices dropped 31 cents from February in Des Moines and Ft. Dodge, Iowa; also in St. Louis and Springfield, Mo. In nearly all of the other markets reporting in this region, Class I prices dropped 10 or 11 cents per hundredweight. Changes in consumer prices were limited to an increase in store prices in Burlington, Iowa and a decline in Wichita, Kans.

Class I prices paid by dealers in the South Atlantic Region averaged \$6.65 per hundredweight in March, down 1 cent from a month earlier but 60 cents above a year earlier. Price changes from February in this region were limited to a increase of 13 cents per hundredweight in Bristol, Va. and declines of 10-11 cents in Jacksonville and Tampa, Florida. In the East South Central Region, the average Class I price was \$6.07 during March, down 11 cents from February but 39 cents more than March 1966. Prices per hundredweight dropped 56 cents from February in Memphis, Tenn., 31 cents in Paducah, Ky., and 9 cents per hundredweight in Lexington and Louisville, Ky. Store prices to consumers declined from February in Ky. markets, also in Nashville and Chattanooga, Tenn.

The most pronounced decline in Class I prices from February was recorded in the West South Central Region. The average price per hundredweight in this area was \$6.25 during March, 39 cents less than a month earlier but 34 cents more than March 1966. All Texas markets showed sharp price declines from February to March--ranging from 41 cents per hundredweight in Amarillo to a 52 cents in Austin. Other important declines in this region were 56 cents in Little Rock, Ark. and 30 cents in New Orleans, La. Milk prices to consumers in Oklahoma City were down sharply from February both for home delivery and at stores. Substantial decreases in store price were reported in Austin, Corpus Christi, Dallas and Lubbock, Tex.

Class I prices paid by dealers during March in the Mountain Region averaged \$6.15, down 14 cents from February but 47 cents above March 1966. The Albuquerque, N.M. price was down 43 cents, Arizona markets down 17 cents, Colorado markets down 13 cents, and Salt Lake City down 15 cents. Dealers' prices in Pacific Region markets were mostly unchanged from February, except for small declines in Everett - Seattle and Spokane, Wash. For the region, the average Class I price was \$5.61 per hundredweight in March, 1 cent less than February but 27 cents more than March 1966.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS
(Tables on pages 21-26)

January sales of whole milk in 76 marketing areas under regulation (67 Federal and 9 State) averaged 102.7 million pounds per day, 1 percent less than a year earlier. December 1966 whole milk sales in 75 regulated areas were down 2 percent from December 1965. December sales of skim-milk products in 74 regulated areas averaged slightly above November on a daily basis and were up 14 percent from December 1965.

December 1966 sales of milk and cream mixtures (half and half) in 72 regulated areas were up 5 percent from November (dairy average basis) but were 4 percent below a year earlier. Sales of other cream products made a strong seasonal gain of 24 percent from November to December but were 2 percent short of a year earlier. Combined sales of fluid products in regulated areas during December averaged slightly below November on a daily basis, but slightly above December 1965.

January receipts of milk from producers by plants regulated for 66 Federal and 8 State marketing areas were 2 percent above a year earlier. Receipts per producer averaged 1,027 pounds per day in January, up 8 percent from January 1966. Milk production in The United States during February is estimated at 9,217 million pounds, about 1 percent above a year earlier. On a per capita basis, February production provided 1.66 pounds of milk per person daily for all uses, the same as a year earlier.

a. Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

Table 2.--Prevailing prices of the most common grade
of whole milk in 25 cities, March 1967 a

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised.

F-Federal Order unless otherwise noted; S-From State sources. FS-From Federal and State sources. a. Quantities sold in defined marketing areas (Federal areas adjusted for comparability where necessary); data for 1965 revised, 1966 preliminary. See page 31 for area combinations. b. Delaware Valley less sales in New Jersey as reported by the Office of Milk Industry. c. Sales not shown or included in group totals for markets where individual operations might be disclosed: Cincinnati, Northeastern Ohio, Upstate Michigan, Milwaukee, Duluth-Superior, Des Moines, Sioux City, Wichita, Central West Texas, Corpus Christi, Lubbock-Plainview, Texas Panhandle, San Antonio, Inland Empire, Washington, D. C., Southeastern Florida, Knoxville, Central Arkansas, Central Arizona, Rio Grande Valley. d. Plain and flavored whole milk and yogurt combined; also whole lactic and creamed buttermilk for North Carolina. e. Memphis sales in Mississippi excluded. f. Computed from unrounded data. Totals include data for markets which have not been shown to avoid disclosure of individual operations. For comparability, totals include only those areas where data are shown or indicated for both years. g. Includes fluid milk equivalent of concentrated milk.

Compiled from reports of Market Administrators and State milk control agencies.

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Ft. Wayne and Indianapolis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Florida-Southeastern Florida, Tampa Bay, (Receipts only). Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.

ANNUAL SALES OF INDIVIDUAL FLUID PRODUCTS, 1966 (Tables on pages 27-30)

Combined sales of whole milk products during 1966 in marketing areas under State and Federal regulation were a fraction of a percent below 1965 totals. Plain whole milk sales in 1966 were 0.3 percent less than 1965 sales, while yogurt sales were up 24 percent and flavored whole milk marketings gained 5 percent. Sales of skim-milk products as a group increased 12 percent from the 1965 total. Fortified skim-milk sales were up 23 percent; plain skim, up 10 percent; and flavored skim, up 1 percent. Buttermilk sales declined 1 percent. Sales of cream mixtures (half and half in most markets) were down 2 percent while eggnog sales in 1966 increased 11 percent from a year earlier. Marketings of other cream products during 1966 were 4 percent less than in 1965. Heavy and light cream declined 6 and 13 percent, respectively, in 1966 but sour cream gained 7 percent over the 1965 total.

CURRENT SERIAL RECORDS

PRICES IN FLUID MARKETS

Prices paid by dealers in 176 markets for milk used for fluid purposes averaged \$6.01 per hundredweight in early April, according to the Crop Reporting Board. The April average is the same as the March average and 42 cents above a year earlier. Dealer's prices increased in about 22 of the markets, declined in 17 markets and continued unchanged in other markets. Regional changes from the previous month ranged from a increase of 25¢ per hundredweight in the West South Central Region to a decrease of 14¢ in the South Atlantic.

Store prices to consumers for the most common grade of whole milk sold in 25 cities averaged 50.1 cents per half gallon in early April, about the same as a month earlier and 1.9 cents above a year earlier. Prices of home delivered quarts in the 25 cities averaged 30.9 cents in April, about the same as March but 2 cents more than a year earlier.

In New England, the average dealers' Class I price for April was unchanged from March but 44 cents per hundredweight more than April a year ago. Prices out of stores dropped 5¢ per half-gallon from March in Bellows Falls but continued unchanged in other markets of the area. Home delivery prices continued mostly unchanged in New England. The average price of Class I milk in the Middle Atlantic States was \$6.30 per hundredweight, 7 cents less than a month earlier but 33 cents more than a year earlier. Changes in Class I prices ranged from small increases in Northern New Jersey and most New York markets to a 40 cent per hundredweight decline in some other markets of New Jersey and Pennsylvania. In most markets of this area, out of store and home delivery prices continued unchanged or declined slightly.

Dealers' prices for fluid-use milk in the East North Central Region averaged \$5.50 per hundredweight in April, 1 cent more than during March and 53 cents above a year earlier. Class I prices were up in three out of five of the Indiana markets and unchanged in most other markets of the region. Milk prices to consumers continued mostly unchanged from a month earlier except for the Rockford market where store prices were down sharply. In the West North Central Region, dealers' Class I prices averaged \$5.27 per hundredweight in April, up 12 cents from March and 40 cents above April last year. Prices for Class I milk increased from March in the St. Louis and Springfield, Mo. markets; were down slightly in the Kansas City, Topeka, and Wichita markets; and unchanged elsewhere in this region. Milk prices to consumers continued mostly unchanged from March in this region except for Des Moines where out-of-store prices on half-gallons showed rather substantial price declines.

Class I prices paid by dealers in the South Atlantic Region averaged \$6.51 per hundredweight in April, down 14 cents from a month earlier but 46 cents more than a year earlier. Class I prices were down 25 to 40 cents per hundredweight in the Delaware, Md. and Washington, D. C. markets and unchanged elsewhere in this region. Prices to consumers for milk sold out of stores and delivered on home routes continued mostly unchanged compared with a month earlier.

In the East South Central Region, the average Class I price was \$6.25 in April, up 18 cents from a month earlier and 53 cents above a year earlier. Class I prices were down 30 cents per hundredweight in Mississippi markets, up 42 cents in Alabama and mixed in the Kentucky and Tennessee markets. Sharp price increases were reported in Class I prices in the West South Central Region. The average price was \$6.58 per hundredweight in April, 25 cents more than a month earlier and 65 cents above a year earlier. Class I prices were unchanged in Louisiana, up 30 to 40 cents per hundredweight in most Texas markets and mixed in Arkansas and Oklahoma markets. Gallon and half-gallon prices to consumers were up sharply in the Oklahoma City market, down in Abilene, and mostly unchanged elsewhere. Home delivery price continued mostly unchanged.

Class I prices paid by dealers during April in the Mountain Region averaged \$6.12, down 3 cents from March but 36 cents above April 1966. Class I prices in most markets in this area were unchanged or down slightly. Prices out of stores to consumers were mostly unchanged except in Albuquerque where large increases were reported. Home delivery prices were mostly unchanged. Class I milk prices in the Pacific area averaged \$5.61 per hundredweight in April, unchanged from the previous month but 26 cents more than a year earlier. Class I prices were down in Washington and unchanged elsewhere. Out-of-store prices of gallons and half-gallons in Washington were down but unchanged in most other markets. Home delivery prices continued mostly unchanged from a month earlier.

SALES OF FLUID DAIRY PRODUCTS & RECEIPTS OF MILK FROM PRODUCERS (Tables, pages 22-27)

January sales of whole milk in 76 marketing areas under regulation (67 Federal and 9 State) totaled 92.1 million pounds per day, 2 percent less than a year earlier but 1 percent more than December 1966. Sales of skim milk products during January in 75 regulated areas averaged 3 percent more than in December 1966 and 13 percent more than January 1966.

In 74 regulated areas, January sales of milk and cream mixtures (mostly half and half) totaled 1.1 million pounds per day, 7 percent less than December 1966 and 6 percent less than a year earlier. January sales of other cream products in 74 areas were 34 percent less than December sales and 4 percent less than a year earlier.

Combined sales of fluid products in regulated areas during January averaged slightly below both the preceding month and January 1966. Preliminary data on February sales of fluid products in 74 marketing areas averaged 93.3 million pounds per day, about the same as a year earlier and 2 percent more than in January.

February receipts of milk from producers by plants regulated for 66 Federal and 8 State marketing areas were 1 percent above a year earlier. Receipts per producer averaged 1,060 pounds per day in February, up 7 percent from February 1966. Milk production in the United States during March is estimated at 10,510 million pounds, slightly less than a year earlier. On a per capita basis, March milk production provided 1.71 pounds of milk per person daily for all uses, compared with 1.73 pounds in March 1966.

a. Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In Classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets. * Revised

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised

^{2/} Includes consumption by Armed Forces stationed in the U. S.

CONSUMPTION OF FLUID MILK AND CREAM IN THE UNITED STATES, 1966

Beginning with this report, consumption of fluid milk and cream is reported in separate estimates--sales of fluid products, and household consumption on farms where milk was produced. Estimated sales include consumption by members of the Armed Forces stationed in the United States. The two new series of estimates replace the former series of separate estimates of non-farm consumption and farm consumption (including farm families using purchased milk and cream).

Total sales of fluid dairy products in 1966 are estimated at 55.6 billion pounds of whole milk equivalent. The increase of four-tenths of one percent in total sales from 1965 was the smallest year-to-year gain in the last 5 years. Annual sales averaged 291 pounds per capita in 1966, down 3 pounds from 1965. Household consumption of fluid milk and cream on farms where milk was produced is estimated at 3.2 billion pounds for 1966, about 6 percent less than in 1965. Total consumption of milk and cream (sales plus farm consumption) totaled 58.8 billion pounds in 1966, the same as in 1965. Fluid consumption averaged 300 pounds per capita in 1966, down 3 pounds from 1965 and in line with declines for the two preceding years. All of these consumption estimates are expressed in whole milk equivalent. This is the quantity of whole milk, as produced, which is required to provide the milkfat used in all fluid products.

FLUID MILK AND CREAM REPORT

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

MAY 1967

JUN 1 - 1967

May 19, 1967

CURRENT SERIAL RECORDS

PRICES IN FLUID MILK MARKETS

May 1967 prices paid by dealers for milk used for fluid purposes averaged \$6.11 per hundredweight for 176 markets, according to the Crop Reporting Board. The May average is up 10 cents from April and 61 cents above a year earlier. Compared with April 1967, dealers' prices for May increased in 39 markets, decreased in 2 markets and were unchanged in the other markets. Regional changes from April ranged from practically no change in the West South Central area to an increase of 22 cents in the South Atlantic Region.

Store prices to consumers for the most common grade of whole milk sold in 25 cities averaged 50.5 cents per half gallon in early May. This was only slightly above a month earlier. Home delivered quart prices for the 25 cities averaged 31.0 cents in May--about the same as April but 2 cents higher than May 1966.

In New England, dealers' Class I price averaged \$6.81 per hundredweight for May up 20 cents from April and up \$1.08 per hundredweight from May 1966. The largest consumer price increases (up to 14 cents per half-gallon) were reported in New Hampshire. Home delivery prices in New England in early May were mostly unchanged to 1 cent higher than a month earlier. Class I milk prices in the Middle Atlantic States for May averaged \$6.44 per hundredweight--up 14 cents from April and 71 cents per hundredweight over May 1966. Store and home delivered prices were reported unchanged or higher in all except the Syracuse and the Nassau-Suffolk, New York market areas, where decreases were reported.

Dealers' prices for fluid-use milk in the East North Central Region averaged \$5.58 per hundredweight in May -- up 8 cents from April and 60 cents above May 1966. Milk prices to consumers continued mostly unchanged from a month earlier except for the Rockford, Illinois market where store prices on gallon containers rose sharply, returning nearer the March 1967 level. In the West North Central Region, dealers' Class I prices averaged \$5.29 per hundredweight in May--up 2 cents from April and 42 cents above May last year. Consumer prices in most markets were unchanged from April 1967, but in St. Louis, Missouri and Rapid City, South Dakota store prices were down sharply. In Springfield, Missouri prices were up slightly from April. Few, and only relatively small, changes were reported for home delivery prices in the West North Central Region.

Class I prices paid by dealers in the South Atlantic Region averaged \$6.73 per hundredweight in May--up 22 cents from a month earlier and up 66 cents from a year earlier. By individual markets in the region, Class I prices ranged from unchanged to 65 cents higher than a month earlier in all but the Tampa, Florida market. The Tampa Class I price averaged 10 cents lower than the April 1967 level. Prices paid by consumers for milk sold out of stores and home delivered were mostly unchanged from a month earlier for the region.

In the East South Central Region, the Class I milk price averaged for May, at \$6.26 per hundredweight, was 1 cent above a month earlier and 55 cents above a year earlier. Class I prices compared with a month earlier were up in Kentucky markets, mixed in Tennessee and unchanged in Alabama and Mississippi. Class I prices for May in the West South Central Region averaged \$6.56 per hundredweight. Individual market prices were mostly unchanged to slightly lower than a month earlier. Only Lawton, Oklahoma and El Paso, Texas reported general increases over April 1967 dealer buying prices. Consumer prices in May were mostly unchanged to higher than for April 1967. The most significant increases were for gallon containers sold in stores in the Corpus Christi, Texas.

Class I prices paid by dealers during May in the Mountain Region averaged \$6.19 per hundredweight--up 7 cents from April and up 43 cents from May a year ago. Class I prices in most markets in the region were unchanged to moderately higher than April. A sharp increase over April was reported for Albuquerque, New Mexico. Consumer prices were down moderately from April 1967 in Albuquerque but mostly unchanged in other markets of the region. Consumer price levels generally held for both out of stores and home delivered milk. Class I milk prices in the Pacific Region averaged \$5.62 per hundredweight for May --about the same as for April but 25 cents higher than May a year earlier. Class I prices were up in Washington and unchanged elsewhere. Most consumer milk prices were slightly to moderately higher in Washington but unchanged in other markets compared with April 1967 levels.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

February sales of whole milk in 76 marketing areas under regulation (67 Federal and 9 State) totaled 93.5 million pounds per day, two percent less than a year earlier but two percent more than January. Daily sales of skim milk products during February in 75 regulated areas averaged 4 percent more than January and 13 percent more than February 1966.

In 74 regulated areas, February daily sales of milk and cream mixtures (mostly half and half) totaled 1.2 million pounds per day, 4 percent more than January but 5 percent less than a year earlier. February daily sales of other cream products in 74 areas were 7 percent more than the January daily average but 4 percent less than a year earlier.

Combined daily sales of all fluid products during February averaged two percent more than January but about the same as a year earlier. Preliminary data on March sales of fluid products in 74 marketing areas averaged 93.2 million pounds per day, about 1 percent below a year earlier and slightly below a month earlier.

March receipts of milk from producers by plants regulated for 66 Federal and 8 State marketing areas were 1 percent below a year earlier. Receipts per producer averaged 1,066 pounds per day in March, up 4 percent from March 1966. Milk production in the United States during April is estimated at 10,732 million pounds, slightly more than a year earlier. On a per capita basis, April milk production provided 1.80 pounds of milk per person daily for all uses, compare with 1.82 pounds in April 1966.

Table 1.--Dealers' average buying prices for milk for
fluid milk use (f.o.b. city) United States,
by regions, May 1967 a
(Per hundredweight - 3.5% fat; weighted by population of individual markets)

a. Effective prices paid by dealers for milk used for fluid purposes--packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan--New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised.

FLUID MILK AND CREAM CONSUMPTION BY MARKETING AREAS, 1965 AND 1966

Sales and per capita consumption data are shown in this report for marketing areas where comparable data are available for 1965 and 1966. These data continue the series published in Statistical Bulletin No. 312 in May 1962 and in May issues of the Fluid Milk and Cream Report for 1962-66. Data for 1965 are, in some cases, revised from those published a year ago; data for 1966 are preliminary. The per capita estimates are derived data, and therefore are not precise measurements of levels of consumption. Sales data for each specific area were reported primarily for regulatory purposes. For some areas, sales by producer-distributors exempt from regulation are not included in the totals. However, data for each area are comparable from year to year.

The 72 marketing areas for which comparable sales data are available for 1965 and 1966 have as estimated 1966 population of about 123 million people. This represents about 65 percent of the total population using purchased milk.

Whole milk products

Of the 72 market areas with comparable data for both years, 1966 per capita consumption of whole milk products was lower in 48. Consumption per person in 1966 was the same as in 1965 in 4 and higher in 20 areas. The consumption rate was 5 or more pounds lower in 27 of the 48 areas and 10 or more pounds lower in 12. Increases of 5 or more pounds occurred in only 7 of the 20 areas reporting increased consumption. Increases of 10 or more pounds occurred in only 2 areas--the Suburban St. Louis and Ozark.

Skim milk products

Per capita consumption of skim milk in 1966 was higher than in 1965 in 69 areas and lower in 3 of the 72. Increases of 5 or more pounds were reported in 17 of the 69 areas reporting increases and increases of 10 or more pounds were reported in 9. The 3 areas with decreases--Youngstown-Warren, Ozarks and Central Arkansas--each showed only small declines in consumption per person.

Milk equivalent of cream

The milk equivalent of cream sold during 1966 was below a year earlier in 48 of the 70 areas for which data are available. (Milk equivalent is the quantity of milk, as produced, which is required to furnish the milkfat in the products sold.) Fluid cream products include mixtures of milk and cream, eggnog, and various fat concentrations of sweet and sour cream. Consumption of cream in milk equivalent terms in 1966 was about the same as in 1965 in 20 areas and up slightly in only 2 areas--Suburban St. Louis and Chattanooga.

Milk equivalent of all fluid products

Total fluid product sales in milk equivalent terms during 1966 were lower than in 1965 in 41 areas, unchanged in 2 and higher in 27. Increases of 5 or more pounds per person were recorded in 11 areas and 10 or more pounds in only 2 areas. Decreases of 5 or more pounds took place in 26 areas and 10 or more pounds in 10 areas.

SOURCES OF DATA

Sales Data

Sales data for 1966 are included for 72 marketing areas--64 Federal order areas and 8 under State regulation. Sales data for 1966 comparable with 1965 are not available for the New York Metropolitan area or Area 2 of western Pennsylvania. Data are not available for the Chicago area after the Federal order was terminated April 30, 1966. Comparable sales data for 1965 and 1966 are shown for the following areas which have been expanded: Northwestern Indiana area, (formerly South Bend, La Porte - Elkhart area); Kansas City area, now includes the former St. Joseph area; Wichita area, now includes Southwest Kansas; Southern Michigan; Quad Cities- Dubuque; St. Louis; Nebraska- Western Iowa; Louisville-Lexington-Evansville; Paducah; Nashville; Red River Valley and Great Basin. The only duplication between areas is the sales data for Southern New Jersey which are included in both the New Jersey and Delaware Valley totals. Sales data are shown for 7 entire States: Connecticut, New Jersey, North Carolina, South Carolina, Georgia, Mississippi and California.

Sales data for 64 marketing areas were provided by Federal order administrators. Data for the 8 areas under State regulation were provided by the following agencies. Niagara Frontier and Rochester--Division of Milk Control, State Department of Agriculture and Markets; New Jersey--office of Milk Industry, State Department of Agriculture; North Carolina--State Milk Commission; South Carolina--State Dairy Commission; Georgia--State Milk Commission; Mississippi--State Milk Commission and cooperating Federal order administrators; California--Crop and Livestock Reporting Service.

Population Data

Population estimates for marketing areas which cover parts of States are based on trends in the latest available population estimates for counties and other local areas. Annual population estimates are available by counties from various State and local agencies and from U. S. Census Bureau estimates for standard metropolitan statistical areas. For marketing areas which cover entire States, population estimates are based on Current Population Reports issued by the U. S. Census Bureau. All population estimates are adjusted to a July 1 date to approximate the annual average.

F-Federal Order marketing areas unless otherwise noted. S.-Sales data from State sources.
FS-Sales data from State and Federal sources.

a. Quantities sold within the defined Federal Order marketing area or other specified geographic area.

b. Milk equivalent data represent the quantity of producer milk at average test required to provide the milkfat in the respective product groupings.

c. Data for marketing area after the merger and expansion in 1966.

d. Population and the resulting per capita rates revised for earlier years.
(See page 46)

e. All cream items converted to an equivalent of 38 percent cream.

f. Sales in Area 2 (Pittsburgh), Pa. are estimated from Pennsylvania Milk Control Commission data covering total sales for the Area and sales by product by 22 large handlers, and from studies made by the Department of Agricultural Economics and Rural Sociology of Pennsylvania State University. Plain skim milk includes solids added, low fat (2.0 percent) is shown in the solids added column and medium cream (24.1-34 percent fat) is in the eggnog column. Light cream ranges from 18-24% fat and heavy cream over 34 percent fat. Yogurt and eggnog sales have not been tabulated.

g. Delaware Valley sales include the portion of the area in Southern New Jersey which are also included in New Jersey totals.

h. Not reported where individual plant data might be disclosed.

i. Data for marketing area prior to the area change in 1966.

j. Skim milk with solids added and flavored skim milk combined.

k. Data for marketing area after the expansion in 1965.

m. Heavy cream and light cream combined.

n. Sales for marketing area after 1966 expansion.

p. Plain skim milk combined with skim milk with solids added.

q. Includes following quantities of whole lactic milk and creamed buttermilk: 1965, 4,078 thousand pounds, .87 pounds per person; 1966, 4,203 thousand pounds, .88 pounds per person.

r. Includes fluid milk equivalent of concentrated milk.

s. Sour cream includes medium cream.

t. Mixtures and eggnog combined.

u. Plain whole milk and flavored whole milk combined.

v. Skim milk (2 percent fat) in the skim milk solids added column, pastry cream in the eggnog column and table cream in the light cream column.

w. Yogurt, eggnog and sour cream not tabulated.

x. Flavored whole milk and flavored skim milk combined.

y. Heavy cream and sour cream combined.

z. Sour cream and light cream combined.

NA Comparable data not available for 1966.

June 16, 1967

CURRENT SERIAL RECORDS

PRICES IN FLUID MILK MARKETS

Early June 1967 prices paid by dealers for milk used for fluid purposes averaged \$6.16 per hundredweight for 176 markets, according to the Crop Reporting Board. This is up 5 cents from May and 66 cents above a year earlier. Regional price changes from May ranged from a decrease of 2 cents per hundredweight in the East South Central to an increase of 18 cents in the Middle Atlantic. Average dealer prices paid for milk were unchanged or changed only slightly in most regions.

Store prices to consumers for the most common grade of whole milk sold in 25 cities averaged 50.7 cents per half gallon in early June. This was slightly above a month earlier and 2.3 cents above a year earlier. Home delivered quart prices for the 25 cities averaged 31.1 cents in June, only slightly higher than May and 2 cents higher than June 1966.

In New England the Class I prices averaged \$6.81 per hundredweight for June--the same as May but up \$1.08 per hundredweight from June 1966. Consumer prices, both out of stores and home delivered, were mostly unchanged from a month earlier for the area.

Class I milk prices in the Middle Atlantic States for June averaged \$6.62 per hundredweight--up 18 cents from May and 87 cents above June 1966. Store and home delivered prices were reported higher or unchanged in all except the Camden, New Jersey market and several scattered New York market areas including Westchester Co. and Binghamton where decreases were reported.

Dealers' prices for fluid-use milk in the East North Central averaged \$5.58 per hundredweight in June--unchanged from May but 60 cents above June a year ago. Milk prices to consumers continued mostly unchanged from a month ago. In the West North Central Region, dealers' Class I prices averaged \$5.30 per hundredweight in June--up only slightly from May but 43 cents above June last year. Consumer prices continued mostly unchanged from May 1967. A drop in prices paid by consumers was reported in Wichita, Kansas and Rapid City, South Dakota while prices increased in Scottsbluff, Nebraska.

Class I prices paid by dealers in the South Atlantic Region averaged \$6.73 per hundredweight in June--unchanged from a month earlier but 66 cents above a year earlier. Prices paid by consumers for milk sold out of stores and home delivered were mostly unchanged from May.

In the East South Central Region, the Class I milk prices average for June, at \$6.24 per hundredweight, dropped slightly from a month earlier but was 50 cents above a year earlier. Compared with May, Class I prices were unchanged in Alabama and Mississippi, steady to lower in Tennessee, and mixed in Kentucky markets.

Class I prices for June in the West South Central Region averaged \$6.56--the same as a month earlier but 65 cents over the year earlier level. Consumer prices compared with May 1967 were mostly unchanged to lower. The most significant drop in consumer prices was for milk sold out of stores in Corpus Christi, Texas and Fort Smith, Arkansas markets.

Class I prices paid by dealers during early June in the Mountain Region averaged \$6.18 per hundredweight. This was up 42 cents from June 1966. Compared with May 1967, Class I prices in most markets in the region were unchanged to slightly lower. Although a sharp increase was reported for Great Falls, Montana, the only market reporting any increase over May prices, the increase was not enough to offset the declines in other markets. On a regional basis, the average dropped slightly from the May 1967 level. Consumer prices generally held unchanged from May for both out of store and home delivered milk.

The Pacific Region Class I milk prices averaged \$5.63 for June--about the same as for May but 26 cents higher than June a year earlier. Class I prices were up from a month earlier in Oregon but unchanged elsewhere. Most consumer milk prices were unchanged from May 1967.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

March sales of whole milk in 76 marketing areas under regulation (67 Federal and 9 State) totaled 92.6 million pounds per day--down about 3 percent from a year earlier and down 1 percent from the February 1967 average daily rate. Daily sales of skim milk products for 75 regulated areas during March averaged 13 percent more than a year earlier and about 1 percent above February.

In 74 regulated areas, March daily average sales of milk and cream mixtures (mostly half and half) totaled about 1.2 million pounds -- down 5 percent from a year ago but the same as February. March daily average sales of other cream products in 74 areas were 2 percent above the average for March 1966 and 5 percent above February 1967.

Combined daily sales of all fluid products during March 1967 averaged about 1 percent less than both a year earlier and the February 1967 average.

Preliminary data on April 1967 sales of fluid products in 74 marketing areas averaged 89.8 million pounds per day--down 4 percent from a year earlier and down about 3 percent from a month earlier.

April receipts of milk from producers to plants regulated for 66 Federal and 8 State marketing areas were 1 percent above a year earlier. Receipts per producer averaged 1,151 pounds per day in April--up 7 percent from April 1966. Milk production in the United States during May 1967 is estimated at 11,508 million pounds--about the same as a year earlier. On a per capita basis, May milk production amounted to 1.87 pounds per person daily, compared with 1.89 pounds for May last year.

a. Effective prices paid by dealers for milk used for fluid purposes--packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.
b. New York Metropolitan--New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.
c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.
*Revised.

Table 3.--Fluid milk market prices (latest reported to 10th of month)
June 1967

Market	Dealers' buying prices for milk (f.o.b. city)					Prices for most common grade of whole milk				
	Basic fat test	For fluid milk use ^a			For fluid cream use 3.5% fat per cwt.	Whlse. paid by ^b		Consumer prices for milk sold out of stores		
		At basic fat test per cwt.	Fat diff. 1/10%	Adj. to 3.5% fat per cwt.		Stores paper half gallon	Restaurants for disp. milk per gal.	Milkfat test	In paper	
									Quart	Half gal.
